

Co-Founder

with a focus on technical sales and product development

About us

[Holloid](#) is an ambitious high-tech university spin-off. Our unique, patent-protected intellectual property allows scientists, product developers, and quality controllers to image microscopic objects in real-time and with high throughput in 3D. Holloid aims to become a technology leader in environmental and bioreactor monitoring, quality assurance, faster diagnostics in and outside hospitals worldwide. We target a market worth more than 15 billion EUR and provide unique value to some of the fastest-growing areas underpinning the future bioeconomy and medical technologies.

Who we are looking for

We are looking for an entrepreneurially minded scientist with a background in physics, soft matter, material science, microbiology, or other fields related to our technology.

Job profile

As a co-founder, you work independently but in close collaboration with the other co-founders, future team members and in regular exchange with external consultants and partners to

- identify potential applications and clients in the food, biotechnology, pharma, and environmental industries, and beyond;
- find value propositions for a cleaner environment, better products, and improved health;
- spearhead the development of our services and products;
- participate in the sales processes in close collaboration with the commercial management;
- identify, apply and win grants with international consortia and budgets of >1 million EUR.

Requirements

- Entrepreneurial mindset, independent, creative, communicative, and outspoken
- Good communication skills - concise, friendly, and results-oriented with founders, colleagues, and customers (English required, German a big plus)
- Training or experience in microscopy, optics, and colloidal sciences from academia or industry

What we offer

- Work in a uniquely skilled team of co-founders: serial entrepreneurs, inventors, and former startup investors
- Realize your potential faster than anywhere else as we grow; you will get lots of responsibility, autonomy, build and lead a team
- Shape a company from incorporation to unicorn status with your own decisions
- Set the pace for technology development that helps humanity transition faster to a sustainable, cleaner, and leaner industrial future

How to apply

Send us your CV and what else might help us make the right decision to hire you (e.g., motivation letter and letters of recommendation)
